

Only one word adequately
describes our new outdoor
speakers...

Giant.

Introducing MN Series High
Power Speaker Arrays for
Mass Notification
applications.

- ✓ Rugged, proven performance
- ✓ Modular, easily-serviced electronics
- ✓ Clean, reliable and supervised interfaces into the EST3-Sixty platform
- ✓ Maintenance-free speakers
- ✓ Multiple mounting methods

EST BRAND LIFE SAFETY & COMMUNICATIONS FROM EDWARDS

See what's possible now...

Be heard.

EST's High Power Speaker Arrays (HPSA) produce highly intelligible audio for the most demanding outdoor applications. These units are available in a number of different configurations and can, depending on terrain/weather, provide Mass Notification/Emergency Communication (MNEC) or other audio functions for areas as large as a radial mile.

All units operate on 24 VDC, and can be charged from line power and/or solar arrays. HPSAs are interfaced to, and controlled by, the EST3-Sixty family of MNEC and Life Safety System solutions.

MN-GVD Series

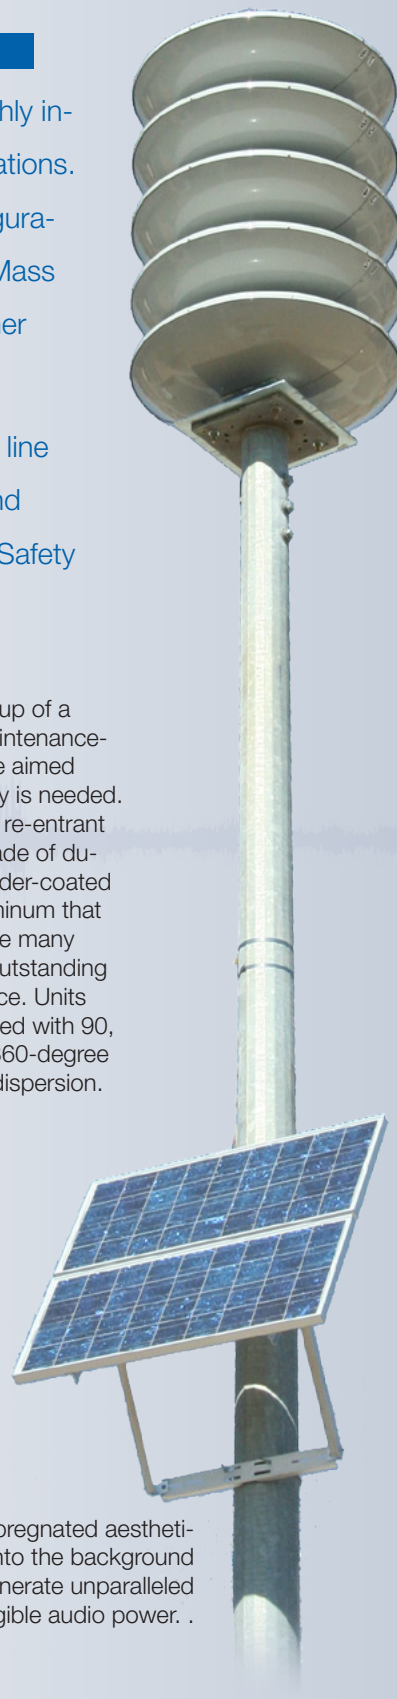

are made up of a single or multiple 400-watt maintenance-free speakers that can be aimed where sound energy is needed.

These rugged re-entrant units are made of durable, powder-coated spun aluminum that will provide many years of outstanding performance. Units can be ordered with 90, 180, 270 or a full 360-degree horizontal angle of dispersion.

MN-GVM Series

are color-impregnated aesthetically pleasing fiberglass layers that blend into the background until they are needed, and then they generate unparalleled omni-directional and highly-intelligible audio power.
