ProCare Patient-Staff Communications Systems

It's all about control.

Sometimes managing your patient-staff communications system can seem like a battle of wills. GE's ProCare 6000 is flexible, scalable and intelligent. Best of all, it leaves you in control.

With ProCare 6000 you manage calls and other events to match your specific patient care model – not the other way around. You determine the best means of meeting the particular needs of your application right down to the finest detail.

And, thanks to ProCare Connect: a suite of advanced monitoring and management tools, your caregivers will spend more time providing quality care for patients, and less time trying to figure out where to go next.

That's because ProCare 6000 delivers patient calls and other key data to staff wherever they might be, helping them provide the care that your patients expect. Using the latest in database, wireless, and networking technologies, ProCare 6000 gets the message to those who need it.

ProCare 6000 is part of a complete family of patient-staff communications solutions that offer popular configuration and scalability options requested by today's healthcare professionals. This makes it adaptable to virtually any healthcare setting. Whether you need a basic call system for one unit or a fully-integrated and networked enterprise-wide system, there is a ProCare solution for you.

Find out how ProCare 6000 can put you back in control. Contact your GE Security representative today!

ProCare Connect: System Control and Monitoring on your terms.

ProCare Connect is a powerful suite of software applications that offers ProCare 6000 applications centralized system management and comprehensive reporting. It represents a single secure integrated platform where you and your staff can efficiently manage patient care.

Components of the ProCare Connect suite of software applications include...

- **Wireless Connectivity:** *Mobility Suite* delivers wireless system connectivity plus PC Assignments and PC Messaging, for a convenient all-in-one solution.
- **Staff Assignment:** *PC Assignments* provides easy point-and-click assignment of staff, wireless devices, and patient beds so patient calls are automatically delivered to the right caregivers.
- **Instant Messaging:** *PC Messaging* provides convenient text messaging to mobile devices like pagers, wireless telephones and Vocera™ pendants
- **Graphical and List-based Annunciation:** *MapView and ListView* provide convenient graphical and list-based details concerning system activity.
- **HL7 Interoperability:** *ADT Bridge* allows the user to import the hospital's HL7 admission, discharge and transfer (ADT) patient information to the SQL database for display with Telligence applications.
- **Management Reporting:** *PC Reporting* measures response times to patient calls and other system activity, and can even schedule customized reports for automatic email delivery.
- **Electronic Whiteboard:** *NetBoard* displays real-time staff and patient information so all your people have the right information at the right time.

Don't struggle with demanding communications systems that seem to work against you. ProCare gives you and your staff the freedom to work so that you make the best use of resources.

ProCare 6000:
A smart choice.
